

LOWONGAN KERJA PERUM LKBN ANTARA: IT

IT Support Engineer (Bloomberg – Antara Partnership Operation)

Requirement:

- Bachelor's degree in IT, Computer Science, Networking, or related field.
- ?At least 1 year of hands-on IT support or network experience.
- ?Skilled in troubleshooting Windows, MacOS, Android, and iOS.
- ?Knowledge of networking basics (routers, switches, TCP/IP, LAN, WAN).
- ?Preferred Certifications (optional but advantages): Data Centre Professional (CDCP), Microsoft Certified Solutions Associate (MCSA), Data Management Professional (CDMP), Juniper Networks Certified Associate (JNCIA-Junos), Cisco Certified Network Associate (CCNA)
- Fluent in English communication skills, both spoken and written
- ?Able to work under pressure and manage priorities.
- ?Strong teamwork and ability to work independently.
- Customer-focused with problem-solving skills.
- ?Able to lift and transport PC and networking equipment.
- Flexible, organized, and physically fit for the role

Responsibilities:

- Provide on-site hardware, software, and network support (in-person and remote).
- ?Install and maintain PCs, routers, servers, and related equipment.
- ?Manage hardware delivery, installation, removal, and inventory tasks.
- ?Deliver professional customer service under pressure.
- ?Guide customers through technology workflows following best practices.
- ?Suggest improvements to recurring issues and support processes.
- ?Record troubleshooting and service activities in the ticketing system.
- ?Multitask efficiently with attention to detail in a fast-paced environment.
- ?Collaborate with team members for smooth support coverage.
- ?Work flexible hours, including occasional evenings or weekends (proper overtime compensation or substitution leave provided).

IT Programmer

Qualifications:

- Bachelor's Degree (S1) in Information Systems or related field.
- ?Proficient in PHP, CSS, JavaScript, AJAX.
- ?Strong knowledge of database systems (MySQL or MariaDB).
- ?Ability to work effectively both independently and within a team.
- ?Interest in social media and digital platforms.
- ?Strong time management skills and ability to work under deadlines.

Responsibilities:

- Develop and enhance CRM applications using PHP and MariaDB.
- ?Design and implement additional application modules to support business operations.
- ?Perform regular data backup and ensure data security.
- ?Collaborate with cross-functional teams to deliver application solutions.
